E-28040 Madrid  
Spain

10<sup>th</sup> September 2021

Dear Prof. Varela Nieto and SEBBM members,

### Good news – you may be eligible to publish your research papers open access at no direct cost to you

Does your funder mandate that you publish your research papers open access? Or do you prefer to publish open access to facilitate more effective research discovery? Either way, you can now do so and at the same time support the work of FEBS.

FEBS is pleased to announce that members of Sociedad Española de Bioquímica y Biología Molecular (SEBBM) can now choose to publish open access articles in its journals ([The FEBS Journal](#), [FEBS Letters](#), [FEBS Open Bio](#) and [Molecular Oncology](#)) at either no direct cost or a discount.

In April 2021, Wiley, FEBS' publishing partner, signed a read and publish agreement with the Conference of Rectors of Spanish Universities (Crue Universidades Españolas) and the Spanish National Research Council (CSIC). Researchers at participating institutions will be able to both access Wiley's journals and to publish accepted articles open access in both *The FEBS Journal* and *FEBS Letters* with no direct charge. This deal is initially for one year, while negotiations continue for a longer-term agreement. Although the gold open access journals *Molecular Oncology* and *FEBS Open Bio* are not part of this deal, authors will be eligible for a discount on the article processing charge for these journals.

Corresponding authors at participating institutions, when submitting articles to either *Molecular Oncology* or *FEBS Open Bio*, will be directed to [this page](#) where they can obtain a code that indicates their eligibility. If their article is accepted for publication, the discount will be applied to their invoice. Authors of articles accepted for publication in either *FEBS Letters* or *The FEBS Journal* should click Order Open Access when prompted (see [here](#) for more details) to make their article open access with no direct charge.

FEBS is delighted to be able to offer this service to members of SEBBM. And of course, all FEBS members and others will benefit from being able to read these articles free of charge immediately on publication.

Such 'transitional' arrangements move the FEBS Press journals closer to a more open research landscape, fostering a rapid pace of discovery and scientific advancement. At the same time, the long-term future of the journals, and the funds that they provide for FEBS other activities, is secured.

We hope that you will consider submitting your next paper to one of the four FEBS journals.

Yours sincerely,

Prof. Václav Pačes  
FEBS Secretary General

Prof. Johannes Buchner  
Chair, FEBS Publications Committee
